Koehler Paper announces global 10% price increase for point-of-sale and label thermal paper

Oberkirch, Germany, 03/02/2026 – Koehler Paper, part of the Koehler Group and one of the world's leading manufacturer of thermal paper, is announcing a global price increase of 10% on all POS and label thermal paper for deliveries from April 1, 2026 onwards.

This adjustment is driven by significant cost increases in pulp, chemicals used in the production of thermal paper, and global freight and logistics. These developments have placed considerable pressure on production and supply chains in recent months. Despite extensive internal efficiency measures, a price adjustment is necessary to continue ensuring reliable supply and the consistently high quality of Koehler Paper's products.

As always, the sales team will contact all customers individually to discuss the details of the price increase and ensure a seamless implementation.

More about the Koehler Group

The Koehler Group was founded in 1807 and has been family-run to this day. The Group's core area of business is the development and production of high-quality, specialty paper, including thermal paper, playing card board, drink coasters, fine paper, carbonless paper, recycled paper, decor paper, wood pulp board, sublimation paper, and innovative specialty paper for the packaging industry, too. In Germany, the Koehler Group, with its around 2,500 employees, has five production sites, as well as three more in the USA. The Group operates on an international level, with an export ratio of about 70% in 2024 and annual revenue of 1.1 billion euro.

As an energy-intensive enterprise, Koehler invests with its unit Koehler Renewable Energy in renewable energy projects such as wind energy, hydroelectric power, photovoltaics, and biomass. The Koehler Group has committed itself to producing more energy from renewable sources than is needed for paper production by 2030.

With the business unit Koehler Innovative Solutions, Koehler collaborates with start-ups to promote innovations in the core business areas of paper and renewable energy.
